# Complex Algebraic Curves

**COMPLEX ALGEBRAIC CURVES** - *Complex Algebraic Curves (FREE)* Algebraic geometry is a branch of mathematics, classically studying zeros of multivariate polynomials. Modern algebraic geometry is based on the use of abstract algebraic techniques, mainly from commutative algebra, for solving geometrical problems about these sets of zeros.. The fundamental objects of study in algebraic geometry are algebraic varieties, which are geometric manifestations of ...

Milne In the 1970s, derived categories were still quite new, and known to only a few algebraic geometers, and so I avoided using them. In some places this worked out quite well, for example, contrary to statements in the literature they are not really needed for the Lefschetz trace formula with coefficients in  $\mathbb{Z}/m\mathbb{Z}$ , but in others it led to complications.
